GitHub: github.com/sunidhi-17 Mobile: +91 7766946057

SKILLS

Languages: C++, Python, Java
Tools: Docker, AWS, Jenkins, Maven
Platforms: VS Code, GitHub, AWS CLI, Apache CloudStack
Soft Skills: Communication, Adaptability, Time Management, Team Collaboration

PROJECTS

Event Flow - Java Event Reminder System | Link Nov'25 – Dec'25

- Built an end-to-end DevOps pipeline for a Java-based Event Reminder system, transforming a manual workflow into a fully automated, deployment-ready application supporting real-time event operations.
- Implemented Git version control and CI with GitHub Actions, automatically validating Java builds and Docker images on 100% of code pushes, improving build reliability and reducing manual checks.
- Containerized the application with Docker and published optimized images to Docker Hub, enabling platform-independent execution and one-command deployment, reducing setup time by 60%.
  Tech stack: Java, DSA, HTML, CSS, JS, Linux (Ubuntu), GitHub Actions (CI), Docker

SpeakPerfect – AI Language Pronunciation Trainer | Link Mar'25 – Apr'25

- Developed an AI-powered web application using Python and Flask that enables users to practice word pronunciation and receive real-time feedback through speech recognition.
- Integrated Speech-to-Text, Dictionary, and Translation APIs to provide phonetic transcription, meanings, and multilingual vocabulary support across 10+ languages.
- Implemented a pronunciation accuracy scoring system using similarity algorithms to compare spoken input with target words and deliver interactive learning feedback.
  Tech stack: Python, Flask, Speech Recognition, REST APIs, Bootstrap

TRAINING

Data Structures and Algorithm using Java Programming | Certificate Jun'25 – Jul'25

- Undertook industry-focused training on core Data Structures and Algorithms concepts including stacks, queues, trees, graphs, and algorithmic problem-solving using Java.
- Gained hands-on experience implementing optimized solutions using stacks, queues, trees, graphs, and core DSA techniques, improving time–space complexity analysis and problem-solving efficiency.
- Solved diverse coding challenges and applied best development practices to write clean, scalable, performance-oriented Java code.
  Tech stack: Java, Data Structures, Algorithms, Stacks, Queues, Trees, Graphs, Complexity Optimization

.

CERTIFICATIONS

Oracle Certified Foundations Associate | Oracle | Certificate Sept'25
Computer Communications | Coursera | Certificate Nov'24
Bits and Bytes of Computer Networking | Google | Certificate Sept'24

EXTRA-CURRICULAR ACTIVITIES

Hackathon on AI technologies: Advitiya 25 | Link Feb'25

Participated in the Hackathon organized by IIT Ropar

EDUCATION

Lovely Professional University Phagwara, Punjab
B.Tech. Computer Science and Engineering, CGPA: **7.39** Aug'23 – Present

Jawahar Navodaya Vidyalaya, Dumka Dumka, Jharkhand
Intermediate- PCM; Percentage: **76%** Mar'22 – May'23

Jawahar Navodaya Vidyalaya, Dumka Dumka, Jharkhand
Matriculation; Percentage: **90.8%** Mar'20 – May'21
